

SITUATION:

HH comp consists of mother, father and 4 CW/FS children. The case has been converted to a 30-0 due to the disability of both parents. There are doctor statements on file for the mother that clarify she is long term disabled. The case for the father simply has the narrative from the employment services worker stating this is why his case was closed. Case was pulled from the all families universe which is correct.

Question:

Do we code T48 the same for both adults as we do in the cases from the 2-parent universe? Is the narrative from the ES worker sufficient to verify the client's disability?

ANSWER:

The narrative from the WTW worker is sufficient.

The mother should be coded 7 in T48.

Dad will be code 14 (No Hours of Participation).

The WTW requirement is 30 hours per week for this family.
