

**SITUATION:**

HH consists of questions mom, dad and 3 kids. The case was pulled as an April primary sample. The case was discontinued 5/31/03 for the client not providing the April CW7. This is the CW7 that we need to determine the income and hours of the client for the RM.

**QUESTION:**

Do we drop this case, or complete the review using all information we have on hand? Are we correct that since it is an April sample, we need to use the info from the April CW7, or should we be looking at the Feb CW7 since we are in a retro budgeting system?

**ANSWER:**

Complete the review using the available information. Try a phone call and letter to last known address. Use April CA7. Check if there is any data on Feb CA7 that can be followed up on, that may be a lead. Outside of that, we are left with the information at hand.
